Version 1.0a, 2021/07/26: Documentation updated

- Fixed a few typos in the stream crossing example of the Quick Reference.
- Changed the revision date to be fixed (not using `July 26, 2021`).
- License normalized to LPPL 1.3c in both `pfdicons.sty` and `README.md`.
- Forced a page break at Fluid transport to stop a runoff on pg. 10.
- Incorporated the `accsupp` package to enable copy/paste without line numbers, and enabled `columns=fullflexible` to help minimize the number of erroneous whitespaces.
- Fixed a few miscellaneous code alignment mistakes (remnants from an accidental "hard line break" in TeXstudio).

Version 1.0, 2021/07/23: Initial release

- Package file: pfdicons.sty
- Primary files: README.md, pfdicons-doc.tex, pfdicons-changelog.tex
- Derived files: pfdicons-doc.pdf, pfdicons-changelog.pdf.
